Bitcoin class at Wake Tech

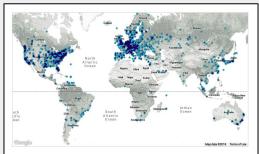

Is this a better money for our world?

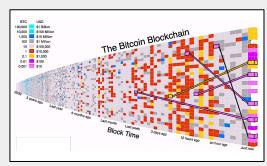

The price of Bitcoin has doubled every 7.25 months

The Bitcoin network is the world's largest supercomputer

The Bitcoin blockchain has no need for banks

Wednesday nights 6-8pm for eight weeks starting August 22nd 2018

Week 1) What is money? An overview of why money arises in a society and the forms it has taken in the past.

Week 2) The Invention of Bitcoin: A summary of the build up, release, and aftermath of Satoshi Nakamoto's invention.

Week 3) Cryptography: The fundamental computer science needed to understand Bitcoin's security model.

Week 4) Bitcoin Addresses: How Bitcoin addresses are created and used.

Week 5) Bitcoin Transactions: How Bitcoin is transferred from one address to another without a trusted third party.

Week 6) Blockchain and Mining: What "blockchain technology" means and how mining acts to secure the network.

Week 7) Wallet and Security: The leading providers of wallet software and best practices. Week 8) Exchanges and Regulation: How US dollars are exchanged for Bitcoin and how this is regulated by the government.

Location: Near the 440 Beltline & Wake Forest Rd
